

Lazarou Perming Men's Hair

This course is our most advanced perming course. It is designed to bring barbers and stylists to the next level. The main topics covered on the course include rolling techniques, rod size and placement, advanced perming and styles and producing different looks for stage work. The course uses our unique hands-on approach to training – you will complete all haircuts on clients provided by the academy. With each service you will have our pro trainer at your side giving direct feedback and support. We will also use trainer demonstrations on stage to break down advanced perming methods so that you master the core Lazarou way of perming men's hair.

Lazarou qualifies many barbers and hairdressers every year. Our results-driven training approach is proven and entirely hands-on practical training. This means you won't be spending all your time in books studying theory.

Our pro educators will be always at your side to supervise, build confidence, progress your skill level and deliver exceptional results. Classes are between 4-6 students, with students of all ages.

The course covers the following aspects of barbering:

- Perming
- Winding

By the end of the course, you will be confident at perming. We provide students all clients which means that you spend your time focused on developing your skill. Upon successful completion you will receive a Lazarou certificate.

What you will cover:

- Health and safety
- Equipment required
- perming
- Rod size
- Placement and techniques
- Neutralising
- Products recommendation
- Aftercare advice and guidance
